### A. Policy:

Maintaining adequate cash reserves is an essential part of sound financial management. The RAWD Board of Directors realizes the importance of reserves in providing reliable service to its customers, financing of long-term projects, in addition to funding availability for emergencies, should the need arise. Interest derived from reserve balances shall be credited to the reserve account from which it was earned. The establishment of any new reserve account will be determined based on the following:

- Purpose and need for the reserve fund;
- Availability and source of funds to maintain, replenish or initially establish the reserve;
- Operating expenditure levels approved with the annual budget process;
- Future capital expenditure and debt service requirements of the District; and
- Board of Directors approval of the reserve policy.

The reserves will be further classified and defined as:

### 1. Operating Reserves:

- <u>Definition and Purpose</u> Established to cover temporary cash flow deficiencies that occur as a result of timing differences between the receipt of operating revenue and expenditure requirements and unexpected expenditures occurring as a result of doing business.
- <u>Target Level</u> Funding shall be targeted at a level equivalent to three months (or 25%) of the District's annual operating budget.
- Events or Conditions Prompting the Use of the Reserve This reserve may be utilized as needed to pay outstanding operating expenditures prior to the receipt of anticipated operating revenues.
- Periodic Review Dates Reserve balances shall be reviewed as part of the Quarterly Financial Review with the target level examined by General Manager and set by the District's Board of Directors as part of the annual budget purpose.
- Records Retention Records will be retained in accordance with Item #'s <u>83</u>, and <u>100</u>, on the Records Retention Schedule.

The accounting pronouncement known as Governmental Accounting Standards (GASB 45, 75), has required recognition of post-retirement benefit obligations as part of the financial records. The District is not required to fund the liability at this time, but the District acknowledges the need to begin funding the liability. The District is not in a financial position to fund the entire liability so the Board of Directors has decided to begin partial funding in smaller increments while continuing to "pay as you go".
- <u>Target Level</u> The partial annual contribution will begin at \$12,160 for RAWD and \$9,200 for RAID, to be evaluated and/or adjusted every three years based on the actuarial evaluation analysis of potential retirees and projected health care increases with consideration of funds available for allocation from the budget process.
- Events or Conditions Prompting the Use of the Reserve Deposited reserves
  may not be used for anything other than the retiree medical cost obligations.
  Annual projected reserves to be contributed may be adjusted based on funds
  availability until such time as the Directors have determined a restricted
  annual contribution with the intent of eliminating the long term liability.
- <u>Periodic Review Dates</u> Reserve balances shall be reviewed by RAWD Staff and set by the RAWD Board of Directors on a tri-annual (every 2 years) basis as part of the budget process following the required actuarial valuation prepared for the District.
- Records Retention Records will be retained in accordance with Item #'s <u>83</u>, and 100, on the Records Retention Schedule.

### 4. Growth (Fund) Reserve:

- <u>Definition and Purpose</u> Established to provide future funding derived from capacity expansion fees collected on new development resulting in increased service demand to the District's operating distribution, collection and treatment systems. Initial fee schedules were identified and established with Resolutions 2-90 (adopted 9/5/90), 3-90 (adopted 9/5/90), 1-92 (adopted 1/15/92) by the Board of Directors. The fee structures were established 9/5/90 and are increased annually on March 1<sup>st</sup> in conjunction with the Construction Cost Indexes.
- <u>Target</u> Self supported by development.

- Events or Conditions Prompting the Use of the Reserve This reserve may
  only be utilized for costs associated with future user capacity improvements as
  approved by the RAWD Board of Directors. Any other use of this reserve
  shall not occur without prior authorization from the RAWD Board of
  Directors.

### 5. Annual Debt Service Reserve for CFD 2011-1:

- <u>Definition and Purpose</u> USDA Rural and the State Revolving Fund (SRF) require the deposit of one year's annual debt service in an interest bearing account for the life of the project loan (40 years for USDA) and (20 years for SRF).

### XVII. ACCOUNTING PROCEDURE FOR ANNUAL BAD DEBT EXPENSE

### A. Policy:

Bad debt expense represents the amount of non collectible accounts receivable in a given accounting period. The reason a bad debt expense is allowed is because it is offsetting revenue that was previously recorded. Foreclosures and bankruptcies are true examples of bad debt expense. The District writes off bad debt through the Accounts Receivable Program to adjust accurate Accounts Receivable Balances. These entries are revised at year end and debited to Bad Debt Expense.

### B. Procedures:

• Monthly we will continue to write off amounts to income accounts through our adjustments to Accounts Receivable Program (CUSI). This way Accounts Receivable will always balance with the General Ledger.

- On the last day of the fiscal year, all true write-offs (i.e. Foreclosure/Bankruptcies) including source documents and journals will be copied and totaled by bill code.
- After year end internal income reconciliations are prepared and balanced and year end income/expense reports are generated, one journal entry will be prepared crediting the total of write-offs back to their respective income accounts and debiting the Bad Debt Expense Account.
- Records will be retained in accordance with Item #4, on the Records Retention Schedule.
